		Adjectives	Adverbs	Preposition	Spellings	Q/A	R/C	

(Reading Section)

- ★ Read the passage given below carefully.

One day, something strange happened. Children came home from school and actually took a nap! They woke up refreshed and went out into the park to play. There was so much time. All the parks in the city were full of children swinging and playing hide-and-seek or just enjoying the cool breeze and the lovely flowers.

Fathers and mothers completed their work and decided to take their families out. Homework was done super quick and well. Some children even dug out their old storybooks and went into their fairyland or up to the moon.

What was the reason for all this odd behaviour? The cable operators were on strike. Television screens had gone blank and something else had to be done. Suddenly, everyone realised that there were so many more interesting things to do rather than just watch television every spare moment of the day. Do you know what some people call a television set? An idiot box. And do you know what they call television viewers? Couch Potatoes.

The man who invented television couldn't have imagined how popular his invention was going to be. Do you know who he was? His name was John Logie Baird.

Baird was an engineer who had got tired of his job. He started inventing things. But most of these things didn't work and soon, Baird was broke. He was then 35 years old. He borrowed money from his friends and invented a machine that could show moving

pictures. That was the first television and since then, people have got completely addicted to it. Try to imagine life without television. Would it be good or bad? That is for you to decide.

Q. 1 A. Choose the correct option to answer the following and write in the given space. (2)

- a) The text talks about.....
 () life without television () life without parks () life without computers
- b) Nobody could watch television because
 () there was no electricity () cable operators were on strike
 () remotes were lost
- c) Some people call television
 () Couch potatoes () Magical box () Idiot box
- d) Baird was
 () an engineer () a cable operator () an electrician

B. Answer these questions. (5)

- List some of the things that people did on the day the screens went blank.

- Who invented television?

- Write True or False- When Baird started inventing things all his invention worked well and he became famous.
- Do you think a television is a useful invention? List two ways in which a television can be useful.

- Find an Adverb and a Preposition from the passage.
